## PROJECTS

---

**NewsBook Web App.** This project is a News web application that allows users to see the latest news and top headlines from different categories. The technologies I have used for this project are: HTML, CSS, JS, and Bootstrap for the front-end design and layout and React.Js for the front-end logic and interactivity.! ([Github Link/Source Code](#)) ([Project link](#))

**Convert Text (Text manipulation).** Developed a user-friendly web application for Text manipulation. Features include converting text to uppercase and lowercase, removing extra spaces and copy text. Technologies used: React.js, Bootstrap, JavaScript, HTML, CSS ([Project link](#))

## CERTIFICATIONS

---

- Problem Solving in C By NPTEL
- Introduction to Industry 4.0 and Industrial Internet of Things By NPTEL
- Management Information System By NPTEL
- Cloud Computing and Distributed Systems

## OTHER SKILLS

---

- I play CRICKET and BADMINTON
